PROFESSIONAL SUMMARY

Detail-oriented Game QA Engineer and Systems Specialist with hands-on technical proficiency in Unreal Engine 5 (World Building, Blueprint logic, UMG UI, scene optimization) and commercial software testing experience. Strong engineering foundation in root-cause defect analysis, collision/boundary verification, and real-time performance profiling (FPS stability, Draw Calls, LODs). Adept at bridging the gap between game art, UI layout ergonomics, and core development workflows to deliver bug-free, high-performance interactive experiences.

SKILLS

Game Engine & Technical QA: Unreal Engine 5, C++, UMG (UI), Performance Optimization, Profiling (FPS & Draw Calls), 3D Asset Validation

QA & Engineering: Quality Assurance (QA), Test Cases, Bug Reporting (Jira), System Thinking, Data Analysis, Workflow Automation

EXPERIENCE

Core Logic | Software House

Krakow, PL | 2025 – 2026

Unreal Engine Technical Artist & Game QA

Built modular 3D environments and level layouts in Unreal Engine 5 using Blueprints and UMG. Executed scene functional/collision testing, resolving level exploits and asset flaws. Profiled real-time performance (FPS, Draw Calls, LODs) for stable optimization.

• *Portfolio / UE5 Demos:* youtube.com/@MaskonDivais/shorts

Freelance / Independent Contractor

Krakow, PL | 2022 – 2025

Full-Stack & Systems Engineer

Engineered full-stack applications with React frontends and structured backend pipelines. Integrated JSON schemas, REST APIs, and AI-assisted workflows to optimize data representation and LLM context retention. Conducted performance profiling and latency optimization.

• *Project / Data Architecture:* github.com/MaskonDivais/data-graph-ai-analytics

Freelance / Self-Employed

Odessa, UA | 2017 – 2022

QA Engineer & UI/UX Specialist | Usability & Functional Testing

Designed UI/UX layouts and responsive frontend components. Executed manual, functional, and usability testing to eliminate visual glitches, cross-browser defects, and edge-case workflow bugs using Jira and UI design systems.

EDUCATION

Bachelor of Science in Systems Engineering

Krakow, Poland | April 2026

The University Of Tourism And Ecology

Cum Laude, GPA 4.47

Relevant Focus: System Architecture, Software Lifecycle, Data Structures & Logic

Technical Diploma in Network Engineering

Odessa, Ukraine | August 2021

College of Computer Technologies

Dean's List, GPA 4.87

Relevant Focus: Network Protocols, Hardware Infrastructure, System Administration

CERTIFICATIONS

FULL STACK SOFTWARE ENGINEER Professional Certificate Meta Platforms, Inc.

Feb 2024
