Start date:	24/Aug/26		

Description

Steps to Reproduce:

1. Launch the game and load Level_02.

2. Move the player character to the main gate entrance.

3. Walk directly into the TriggerBox_Gate area.

4. Observe the gate behavior and output logs.

Expected Result:

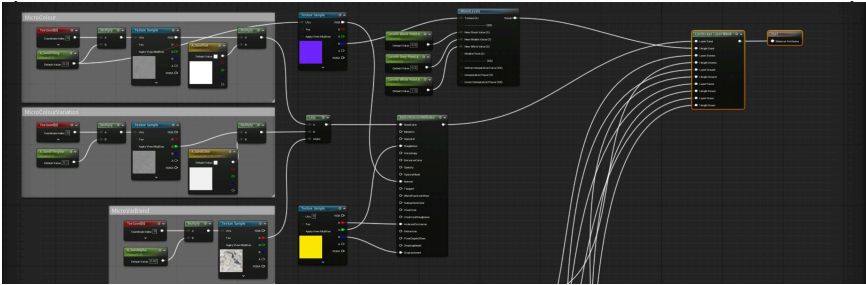

The OnComponentBeginOverlap event triggers successfully, opening the gate and allowing the player to proceed.

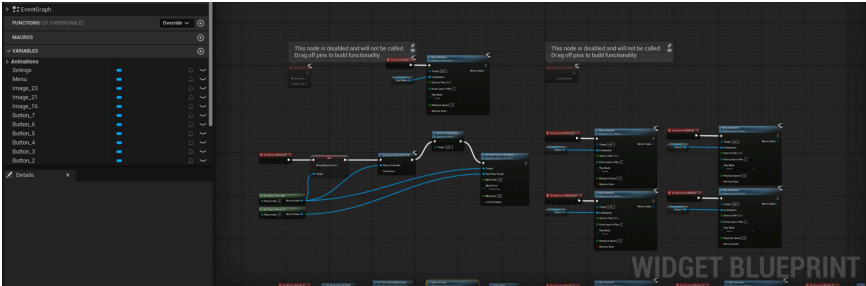

Actual Result:

The trigger box does not register the player's presence. The event fails to fire, and the gate remains closed, causing a softlock.

Severity: Critical

Environment: UE 5.8

Comment by Oleksandr Doroshkevych [24/Aug/26]
Fix Applied:

https://blackseacreator.atlassian.net/si/jira.issueviews:issue-html/UQBA-2/UQBA-2.html

1/2

- Corrected collision profile on BP_MainGate trigger box: switched preset from NoCollision to OverlapAllDynamic with **Generate Overlap Events** checked.
- Added validation check on OnComponentBeginOverlap casting strictly to BP_PlayerCharacter instead of general Actor cast.
- Fixed gate timeline timeline node execution flow.

Comment by [Oleksandr Doroshkevych](#) [24/Aug/26]

QA Verified:

- Progression blocker resolved. Gate opens consistently when the player enters trigger volume from all angles.
- Verified on Build: v0.4.1-dev. **Closed.**
